Youth is not a time of life,
but a state of mind.
青春並非生命的時光，而是一種心靈的狀態

Brief Introduction of Agenda for Su's Family

November 25, 2026

I take it a great honor and pleasure to welcome Su's family today—including **Peter, Sherry, Paul, Barbara, and Issac**. This is truly one of the most memorable and impressive moments in my life.

Looking back more than **50 years ago**, when I was studying in the **Department of Accounting at National Chengchi University**, I took a mandatory English course taught by Sherry's mother—our deeply respected teacher, **Professor Hui-lin Lo**. That was how I came to know her family, marking the beginning of a lifelong connection that profoundly shaped my destiny.

Even now, those memories remain vivid and fresh. Professor Lo's guidance has the strong foundation for whatever achievements I have attained today, and I hold her in the deepest, most affectionate remembrance. Among her teachings, the one phrase that has remained unforgettable throughout my entire life is: "**Don't fall into the pitfalls which you stumbled before**."

Upon learning Professor Lo's beloved daughter, Sherry, and her family were returning to Taiwan to visit relatives, I especially invited everyone here for a gathering. Thank you all for coming today. As **Confucius** once said: "**It is a great pleasure to welcome the friends from far far place.**"

Agenda for Today's Gathering

I would like to briefly walk you through our arrangements for today:

First, I will share some of the cultural transformation initiatives I have been driving since transferring to my role as a **Consultant** earlier this year. In addition to corporate transformation, we also emphasize physical transformation and spiritual elevation. The "**Youth Carnival**" (青春嘉年華) event you see here is one such

example. In our department, every Friday is designated as "**Youth Day**," where everyone dresses in stylish outfits, full of energy and spirit.

Next, I will introduce my personal website, "**DiskLink of My Life**." I will select a few topics that I think you might find interesting for us to discuss. This "DiskLink System" has obtained the patents from USA, Japan and Taiwan. This system includes the following nine gates, they are Daily Life, Video Highlights, CD Album, Diplomas, Calligraphy, AI Review, Disk Library, CPS Center and Operation Management. Please feel free to bring up any topic you would like to talk about; I will do my best to accommodate your interests.

Third will be an introduction to the enterprise I serve. Because the **Formosa Plastics Group** is vast and comprises numerous companies, I have prepared a brief corporate overview to give you a comprehensive understanding of our operations.

After our meeting, we can head downstairs to the **Formosa Vegetables** and **Formosa BioMedical** stores for a quick shopping session. I am very glad to give some of our enterprise's products, whether for your personal use or as small gifts for your relatives and friends. I hope you would enjoy that!

Following that, you will visit the "**Nan Ya Trade Showroom**" within the campus. I have arranged for our colleagues to introduce Nan Ya's key products and newly transformed products, allowing you to experience our diverse exhibition space firsthand.

Finally, we will head over to the corporate guesthouse to enjoy dinner together, which will feature our famous "**Formosa Plastics Steak.**" I am confident it will be an unforgettable dining experience to remember.

I hope today's arrangements will bring joy to both the host and guests, leaving us all with wonderful and cherished memories. Thank you very much for all your coming.

Disklink of My Life
